Subject: McCordsville Building Committee

Everyone,

I never got around to deleting my group email addresses that I used during our recent project. As I was getting ready to do that, it occurred to me that I never thanked all of you for your help and support over the years as we planned and built our new addition.

I know that over the time we had some disagreements on the vision, or how to achieve our vision. But it was never hostile, and the discussions never became personal like I have heard stories of from other churches. I think that speaks to the quality of people we have at McUMC, and the fact that we kept Christ at the center of our thoughts...what He would want done to carry on His work. Jessica, Mike and Fred, your firms were absolutely amazing, it was a true pleasure to interact with you and your staffs.

I am very happy with the results of our work, but even prouder to have worked this closely with each of you. When Ray Humpke attended here he once made the comment he was amazed at the amount of talent there was at McUMC. He was right.

Thank you all for your hard work, and may God bless each of you and those you love every day.

Mike Edson
